SKILLS

- Java
- SpringBoot
- DS
- JUnit
- SQL
- JQuery
- JavaScript
- Mockito
- HTML
- Karate
- CSS
- React
- Bootstrap
- Kafka
- PostMan
- Git
- Maven
- Python

EDUCATION

Lakireddy Balireddy College of Engineering

Computer Science and Engineering |
2016 - 2020 | 9.25

- Active member of CSI
- Organized events during college fest.
- Got certificate for standing as one of the 3 toppers.

Sri Chaitanya Junior College

Intermediate(MPC) | 2014 -
2016 | 97%

PROJECTS & CERTIFICATIONS

[URL Shortner](#) (SpringBoot)

[TaskManager](#) (NodeJs + Express)

[SimpleTask App](#) (JS)

EXPERIENCE

Brillio Technologies

Software Development Engineer | Mar 2023 - Present

Project: **Verizon**

- Successfully addressed Blackduck and Fortify issues in Gradle, React, and SpringBoot projects, resulting in a 99% reduction in vulnerability scores.
- Implemented a POC for migrating from JDK8 to JDK17.
- Implemented a POC for migrating from SpringBoot 2 to SpringBoot 3.
- Enhanced test case coverage to 85% across several services using Junit & Mockito

TechChefs - A Virtusa Company

Engineer - Technology | Dec 2021 - Mar 2023

Project: **Intuit - QuickBooks Company Creation**

- Implemented two new features and three enhancements in microservice architecture which serves 20000 requests per day.
- Analyzed and Debugged Microservices Backend code written in Spring Boot and resolved around 40+ defects in the services.
- Re-Factored the existing code for better Exception Handling in one of the Microservice.
- Constantly monitored the Microservice by using different tools like Splunk, Pagerduty, Alerts which helps to make service Bug free and Resilient.
- Developed Karate Automation Scripts which will be used for rapid integration testing during releases.
- Taken 1 initiative to Automate the Manual process by using Python.
- Worked on React Js, JQuery to solve multiple UI related defects.
- Written unit tests using JUnit and Mockito.

Wipro Limited

Project Engineer | Dec 2020 - Dec 2021

Project: **CROAMIS - Qatar Airways**

- Analyzed requirements and designed, developed, implemented new feature in CROAMIS product which saves 10% of Ground Handling team's effort for handling Cargo.
- Analyzed and Debugged the Backend(Spring) code and resolved 60+ defects in the application.
- Refactored the existing code for one of the functionality which improved performance by 60%.
- Re-Designed 2 Jasper Reports using iReport tool which gives better understanding of Shipments booked on a Carrier.
- Fixed 15+ Frontend defects which are written in JavaScript & JQuery
